ROMAN CEMENT.—Great complaints having been made of the inferior quality of some descriptions of Roman Cement, which for some time have been offered to the Building public, Contractors, &c., THOMAS FREKN and Co. beg to assure Architects, Surveyors, Contractors, Builders, &c., that the CEMENT manufactured by them continues, in every respect the same as that produced at their Works during the last five-and-twenty years, and can, consequently, be warranted of the best quality.—Roman Cement Works, Canal road, Kingsland-road.

KEENE'S PATENT MARBLE CEMENT forms an exceedingly hard and indestructible Stucco, which may either be prepared for paint, or finished in imitation of stone, by the addition of Portland or other stone dust.

It is a cheap and efficient substitute in place of wood for skirting, architraves, and other mouldings, in its application for which purpose it checks the progress of Fire and the attacks of Vermin.—Patentees and sole Manufacturers, J. B. WHITE and SONS, Millbank street, Westminster, and Seel-street, Liverpool.

PORTLAND CEMENT.—J. B. WHITE and SONS, request reference to Nos. 384 and 385, pages 313 and 331, of "The Builder," for accounts of experiments on the strength of Portland Cements.—These trials show that for the practical purposes of building, the connecting power of Portland Cement exceeds that of Roman Cement in the proportion of 5 to 3 to one; thus marking it as the most fit material for turning the brick arches of Railway bridges and viaducts of a critical nature, while for firm adhesion to most sorts of stone, as well as bricks, combined with its eminently hydraulic properties, adapt it for such purposes as the building of sea and wharf walls, and the lining of reservoirs, cisterns, baths, &c. Manufacturers, J. B. WHITE and SONS, Millbank street, Westminster.

PORTLAND CEMENT, solely Manufactured by W. ASPDIN, Son of the Patentee. This Cement has been proved, for upwards of twenty years in the Thames Tunnel, to resist the action of water; it is stronger in its cementitious qualities, harder, and more durable than any other description of Cement; it does not vegetate, or stain or turn green; nor is it affected by any atmospheric influence whatever the climate, resisting alike the action of frost and heat. It is manufactured to set in from five to sixty minutes. For all purposes that Cement is applicable the Proprietors challenge competition.—Orders received by Messrs. ROBINS, ASPDIN, and Company, at their Manufactory, Northfleet, Kent, and their Wharf, Great Scotland yard, Whitehall; also by their Agent at the Depôt, 1, Hack Horse, Liverpool.

JOHNS and CO.'S PATENT STUCCO CEMENT and PAINT.—The attention of Architects, Builders, Plasterers, Painters, Merchants, and the Public generally is solicited to the many advantages attached to these celebrated Materials, which, for their appearance, durability, imperviousness, utter resistance to frost or heat, and general economy, distinguish them from all other cements and paints, and fully justify the confidence reposed in them, as shewn by the numerous testimonials received from public bodies and private individuals of the first importance.—Prospectuses and particulars may be obtained from the sole agent, PHILIP HARE, at the Warehouse, 82, Steel-yard, Upper Thames-street.

PARIAN CEMENT, used as a Stucco, cannot easily be distinguished from Statuary or Parian Marble. It is fit for all the purposes of that beautiful material, and does not crack, warp, or efflorence in any degree. The fine quality will incorporate with the most delicate colours; is adapted to ornamic work, frame, imitation of marble, and the most elaborate embellishment. So perfect are its setting or crystalizing properties, that the coarse quality, when applied to newly-built or damp walls, may be immediately polished, painted, or papered; and rooms rendered habitable before the materials ordinarily used would begin to dry.—Manufactured by CHAS. FRANCIS and SONS, Roman Cement Works, Nine Elms, London.

MARTIN'S PATENT FIRE-PROOF and ORNAMENTAL CEMENT. REDUCTION of PRICE.—The Patentees beg to inform their Friends and the Public that they have made arrangements which enable them to offer this invaluable cement at a considerably reduced price. It has now been before the public for many years, and has obtained such a high standing in the estimation of all who have used it, that it is unnecessary to comment on its merits. The Patentees, however, feel called upon to observe, that by its use from the greater amount of surface which a given quantity will cover, and the small amount of labour required in working it, a saving of 33 1/3 per cent. is effected as compared with other cements for internal use. Specimens shewing its beauty, hardness, and applicability to all plain and ornamental purposes, may be seen; and the Cement in any quantity obtained of the Patentees, Messrs. STEVENS and SON, at their Plaster and Cement Works, 198, Drury-lane, London.

BOARD'S PORTLAND, BATH, and IMPROVED ROMAN CEMENT, Dunball, near Bridgwater.—The Proprietor of these Works begs to inform the public that he is now enabled to supply them with an unlimited quantity of the above Cements, and that the Bath and Portland will be found to resemble those celebrated stones both in colour and durability. They are recommended as being superior to all others, for the following reasons:—being made of Inland Stone (and not dredged from the sea as stone for Roman use), they are not impregnated with salt, therefore never vegetate or turn green. The fault generally complained of with Roman, they take a much larger quantity of sand than other cement, never crack, blister, or peel off, and will be found even preferable to stone. They are perfectly Hydraulic, and will set under water in a few minutes; as an external stucco they are impervious to all climates, and not affected by frost or heat; they improve both in texture and durability, and require neither paint nor colour to make them resemble the best Bath and Portland stone, no other mixture being required than common sand. When used as an internal Stucco for walls, staircases, &c., the Bath and Portland Cements in both are required to be trowelled up to a face almost equal to marble, or may be painted or papered on in a few days. The IMPROVED ROMAN CEMENT is made of the same kind of material, and will be found to possess all the qualities of Bath and Portland except that of colour; it is cheaper, and in every respect better, than any previously offered to the public, and only requires one trial to be appreciated.

A stock of these Cements, as well as Blue Lias Lime ground for concrete, always on hand, which may be had at BOARD'S Depôt Stone-yard, Paddington Station, and of the following Agents, viz. Mr. K. Croft, Surrey-street, Strand-square, Liverpool; Mr. Baker, 73, Digbeth, Birmingham; Mr. Furse, Hotwells-road, Bristol; Messrs. Tothill and Co., Temple Backs, Bristol; Mr. W.
